PROFESSIONAL SUMMARY

IT leader with 20+ years of experience across enterprise infrastructure, service operations and systems integration. Since April 2024, I have led a five-person IT department (four direct reports) supporting approximately 300 employees at one six-storey clinic. My scope includes corporate networks, servers, business-critical applications and controlled automation of operational workflows.

CORE COMPETENCIES

Leadership & delivery: IT department management, technical priorities, stakeholder coordination, vendor collaboration, incident and change management

Infrastructure & reliability: Enterprise networking / Aruba, Windows Server / Active Directory, Linux, virtualization, VPN / VoIP, Zabbix / Grafana

Enterprise platforms & integration: MIS / RIS / LIS / HRM operations, APIs, SQL / PostgreSQL / MySQL, internal reporting and workflow automation

Engineering toolkit (secondary): Python / FastAPI, Docker / Nginx, Git / GitHub, JavaScript / React

PROFESSIONAL EXPERIENCE
